PROFILE

I am a recent Iron Yard Graduate in Columbia, SC. I previously worked as a telecommunications technician, splicing fiber and designing blueprints. I have a passion for taking ideas and turning them into something tangible. I am proficient in HTML, CSS, SASS, jQuery, as well as the Adobe Suite. I am interested in finding an opportunity that will further my web development skills and build cool stuff with talented people.

EXPERIENCE

STUDENT/FREELANCER AUG 2015 -

THE IRON YARD ACADEMY I learned web design using the latest technologies in front-end development. I learned the design process, thumbnails, wireframes, mockups, and coding. I've also completed one client project since graduation, CCSCable.com

OUTSIDE PLANT ENGINEER MAR 2011 - DEC 2014

PALMETTO ENGINEERING/CTS Coordinated multiple crews to complete six thousand copper to fiber/VOIP conversions throughout the Southeast. I created several network design blueprints. I communicated with customers and the team to make sure all guidelines were followed and information was up-to date over several projects

FIBER SPLICER JAN 2009 - FEB 2011

S&S COMMUNICATIONS I was the lead fiber splicer on a multi-million dollar fiber optic project. I followed the schematics and instruction given by the client. I completed the project within the deadline.

EDUCATION

GRADUATE AUG 2015

THE IRON YARD ACADEMY The Iron Yard Academy is an intensive, three-month course that accelerates students to be production level developers or designers.

BACHELORS OF SCIENCE DEC 2007
UNIVERSITY OF SOUTH CAROLINA
